

FileMaker Solutions – Apple iOS Device Installation Guide

Requirements:

- Apple iOS device (iPad2, Air, Air2, Mini, Mini2, Mini 3 and over)
- Mac or PC with valid iTunes.

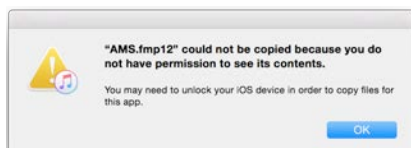

1. Make sure that you have downloaded the free [FileMaker Go 14] on you Apple iOS device.
▀ <http://www.filemaker.com/products/filemaker-go/>
2. Unzip the folder containing the FileMaker Solution (if applicable).
Copy/Move the [Solution.fmp12] file to one of your favorite folders or to your desktop.
3. Open iTunes, connect your iOS device with the USB cable and start sync.
4. Select your iOS device and go to the App folder.

5. Step 1: Scroll down to the File Sharing section
Step 2: Click FileMaker Go (2) 
Step 3: Click [Add], select the [Solution.fmp12] file from your Mac/PC and confirm.

In some cases, you will not be able to copy the file to your iPad and following message will be displayed:

- DO NOT disconnect the USB cable from your iOS device
 - Open the [FileMaker Go] app on your device
 - Redo steps described in the section 5
6. The file should now be copied to your iOS device and ready-to-use. [Solution.fmp12] should appear in the FileMaker Go Documents window.
 7. Disconnect the iOS device from your Mac/PC and close iTunes.
 8. Open the iPad's FileMaker Go  app.
 9. Go to [Device], open the [Solution.fmp12] file.
 10. Log in as specified in the [Access] document provided with your solution.
 11. For easier handling, a stylus pen can be used.

How to save a copy of your Solution on your Mac / PC?

Redo steps described in sections 1 to 4.

In section 5, step 3, select [Save to] and choose a location for your copy.

Contact info@LLT-Solutions.com for installation on a server, local network, or web version.
